## eircom business broadband

See how some of our customers are using eircom broadband

“The web is key. People want to use the web primarily due to its convenience. By continuing to making our products available online we can tap into that demand and expand our global reach.”

**Emer Purcell, MD,  
Hampers & Co**

“Our market went from 4,000 people to four million people overnight. In addition, our overheads remain the same yet we can exponentially grow our revenue through the same costs that we are incurring. I see the website as our core business going forward in 2010.”

**Darren Grant, Owner Manager,  
The Organic Supermarket**

“Quite simply, we would be lost without broadband and our website. The site has allowed us to be more efficient, save money and expand our market – we couldn’t do without it now.”

**Jennifer McHugh, Manager,  
Cakebox**
