

Security Risk Assessment and Compliance Analysis

A comprehensive assessment service to minimise your risk and meet your compliance obligations

Seize the benefits of eircom Security Risk Assessment and Compliance Analysis

- Satisfies Internal Audit
- Provides Gap Analysis to standard(s)
- Enables you to assess and prioritise risks
- Illustrates the nature of the risks to your organisation
- Shows tolerance as to the likelihood and consequence of a threat being realised
- Identifies steps required to fix vulnerabilities
- Shows estimated cost of remedial action

In today's increasingly regulated business environment, complying with legislation means organisations must evaluate controls around key IT systems, policies and processes. A Security Risk Assessment and Compliance Analysis from eircom will ensure your organisation has the minimum level of acceptable risk and avoids the pitfalls of non-compliance.

The burden of compliance

The impact of compliance continues to widen in scope to cover all types of organisations and even specific business process. It is now a given that organisations today need a formalised approach to managing risk and compliance, however, tight IT budgets and limited headcount dedicated to compliance tasks are putting added strain on already taxed IT departments. eircom can help you maximise your resources to achieve a new level of risk mitigation and operational efficiency with our proven Security Risk Assessment and Compliance Analysis methodologies.

Expertise you can rely on

eircom has a proven track record in the design, implementation and management of IP security solutions. We bring a blend of information security specialists with backgrounds in management, engineering, systems architecture and consultancy to create a uniquely intelligent and creative IT security business that ensures you are equipped to secure your organisation in compliance with international standards.

eircom can address your security needs from policy definition and assessment, through process and infrastructure design, to operation and on-going preparedness for accreditation and audit. You can rest assured that all of the security and compliance solutions we can provide to your organisation will be framed in the context of an overall policy informed by your specific risk profile and compliance concerns. eircom can identify compliance gaps or required process enhancements and is available to deploy market leading security architecture and operational support.

Did You Know?

If your organisation relies on computer systems to store, process or move confidential or sensitive information, then you need to be aware of the risks associated with these processes. There are numerous risks associated with impact of an information security incident.

Outcomes can include:

- Loss of citizen information
- Loss of business critical information
- The introduction of viruses / worms to your network
- Operational problems and huge costs to rectify
- Legal problems and costs

Your best defence

Educating personnel in IT security is an organisation's best defence against the ever-increasing threat from hacker attacks, fraud and viruses. eircom offers specialised training solutions, designed to empower business in the application of best practice where IT security frameworks and protocols are concerned.

For further information on any of our risk management and security services, contact your eircom account manager.

What can eircom do for you?

Security Risk Assessment

A Security Risk Assessment presents a realistic impression of your organisation's security risks, enabling you to make wise choices for managing uncertain risks. Our reports detail the vulnerabilities and compliance issues found and the corrective actions required to secure critical systems and mitigate identified risks. Risk assessments can assist in highlighting operational risk that can cause several hours of downtime, loss of revenue and loss of reputation.

Compliance and Standards Analysis and Assessments

To assist you in implementing globally accepted controls frameworks (ISO 27001, ITIL, or CoBIT) we provide a systematic approach to analysing key risk areas, identifying and documenting the controls and then monitoring and measuring the compliance.

Compliance Gap Analysis

The ISO27001 standard provides a structured framework for the implementation of an Information Security Management System (ISMS) within your organisation. We provide full ISO 27001 compliance and pre-certification audit services via our team of experienced ISO27001-certified lead auditors and implementation experts.

Business Continuity Management Assessment Testing & Planning

Our Business Continuity Management services are based on PAS56 (BS25999). We help you evaluate information assets and its criticality levels in determining the strategies for minimum loss in productivity through optimum utilisation of resources. The service is designed to:

- Minimise disruptions of business functions and external entities
- Provide roadmap for disaster recovery operations
- Ensure timely resumption of normal business at earliest possible time
- Limit impact of disruption on company's mission and reputation
- Limit financial losses
